exhibits

...the Staff?

Between now and Spring 2016, when the new structure opens to the public, there is a lot to do!The closing of this building is as much a beginning as an end.

All of the staff will continue in their present employment status. Their duties and work stations will be off site for the next two years in various state buildings. For the next two years...

... the Outer Wall Panels..

two of the concrete panels, from the exterior will be saved and displayed on

Built in 1967-8 to comme morate the centennial of the Alaska Purchase at a cost around \$1,000,000, the existing structure

...the Building?

will be torn down. Not all parts will be demolished, however, such as ...

they survive removal, at least

We will hang on to some and some will be made available for purchase through State Surplus.

...the Furnishings..

whv?

This building is. - 50 years old with lots of wear & tear. Full of asbestos, some abated, some not Filled with a long history of leaks & floods Not wired for the new "digital reality." Notaligned with new floor levels. Also, we need.

- A full basement parking garage - To use every bit of land

"What's going to happen to..." To see Many of the first closing and moving of the first closi

...the BIG Objects?

Any object that does not fit in a standard storage cabinet such as the baleen or the birch barkcance, we are calling "Large." Special storage mounts, crates and enclosures are being made for them now Objects that do not fit though a standard doorway are being a designated "OVERSIZED" such as the..

The Friends of the Alaska State Museum will be closing the Museum Store on November 2. 2013. Renamed the Friends of the Alaska State Libraries, Archives and Museums. they will reopen an expanded retail. space in the new building in the Spring of 2016.

enighe instorby 60 be 2 crate with wheele will hold it till it is not called in the new

Bis most of the Oversized objects is fragile, irreplaceable and very very heavy. It will be kept in its frame & laid flat for moving

...the Ship?

The much beloved model ship Discovery comes a part in about four big pieces. It will be broken down and reassembled in a new location here in towin. We are not exactly sure where vet

More room in the Art Space of the new building will allow us to build a better, more complete Discovery for future generations of voyagers. Hold fast

...the Eagle Tree?

Designed and built in the 1970s from natural materials by (now, Chief Curator, Bob. Banghart, the Eagle Tiee will be replaced by a more durable version in the new building. The new Eagle Tree will stand near a stairway to the second floor for easy. viewing.The eagles will be re-roosted in the new tree

...the Mural?

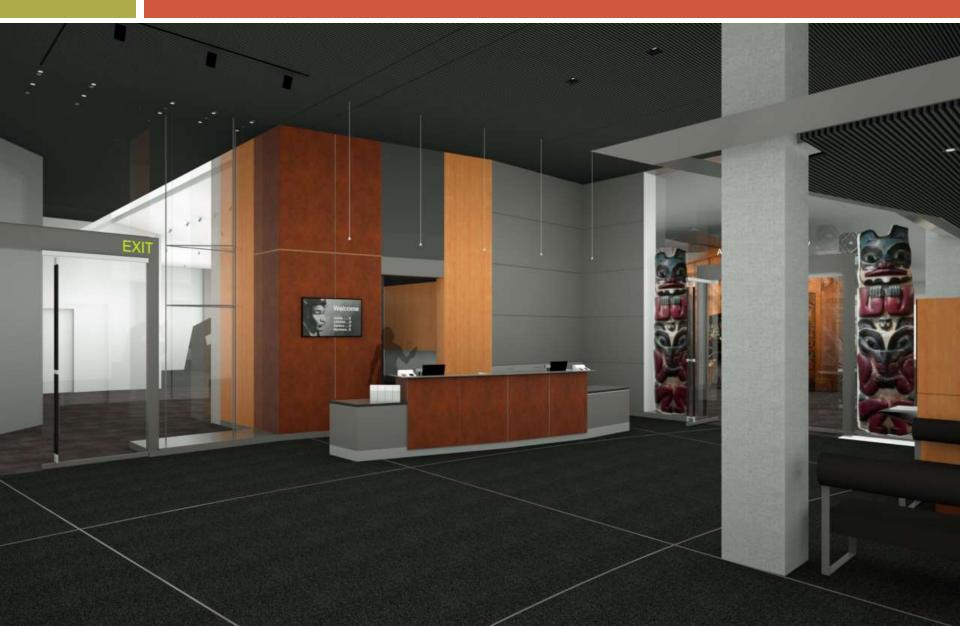

The large mural surrounding the Eagle Tree was painted directly to the walls of this building. Removing those walls, or even sections of them, would involve a bating azardous materials and the pieces would be extremely fragile

Sadly, the mural will be demolished with the rest of the structure.

...the Clan House?

Most of the objects will go on display in a new, improved clan house to be built by a firm in Wrangell for the new place. The house screen and the Frog house posts will be crated and made leady for the proposed clan house in Klukwan. We will save as many of the spruce planks as we can.

Exhibits -- Arrival

Historic As-built Photographs

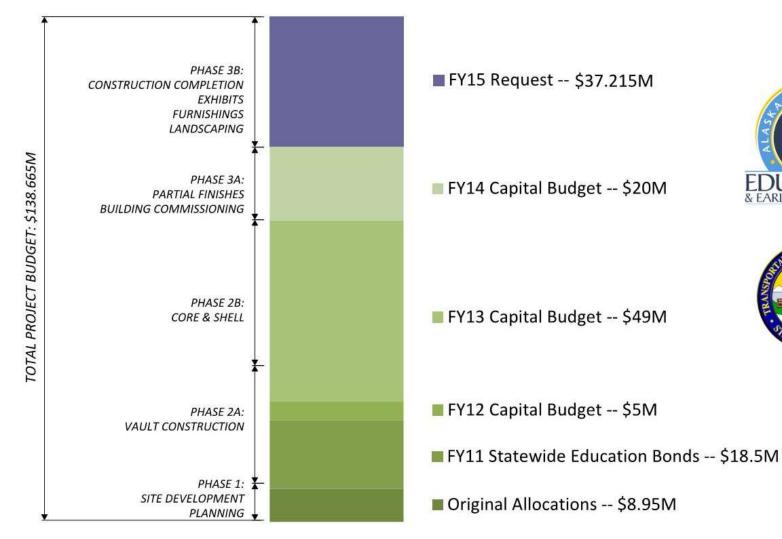

HABS Photos and the original Centennial Museum drawings have been acquisitioned by the State Archives for preservation

Centennial Project

"The old community building stood there. I remember being inside it, lots of times. Clinic, jail, head start for kids, city offices."

Funding Plan

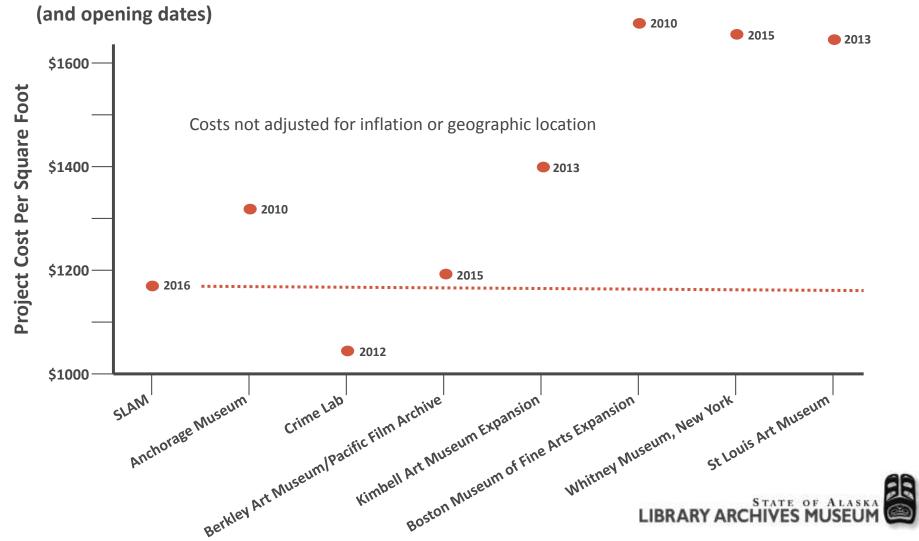

Cost Management

Cost and Schedule Management

- Schedule Impacts are anticipated if full funding is not realized by July 2014. Contracts required to be secured to keep project on schedule.
 - Minimum of 6 month delay is anticipated if funding is not provided by July 2014.
 - Estimated cost per month of delay \$500,000
- \$11M+ of savings have been realized through: smart design & construction solutions, creative use of in-state resources, efficient management practices and in consistent decision-making that add value to the project.

Construction Timeline

Administrative & Procurement (5 Months)

August 2012 - December 2012

Exhibit Installation, Owner Occupancy & Grand Opening - Phase 3E (4 Months)

January 2016 - April 2016
